Sebelum analisis biaya dilakukan, terlebih dahulu dilakukan tes normalitas terhadap biaya riil yang kemudian diperoleh data seperti di bawah ini :

**Tests of Normality**

|            | Kolmogorov-Smirnov(a) |    |         | Shapiro-Wilk |    |      |
|------------|-----------------------|----|---------|--------------|----|------|
|            | Statistic             | df | Sig.    | Statistic    | df | Sig. |
| Biaya Riil | ,107                  | 43 | ,200(*) | ,965         | 43 | ,217 |

\* This is a lower bound of the true significance.

a Lilliefors Significance Correction

Uji yang digunakan untuk mengetahui normalitas dari persebaran data adalah uji Shapiro-Wilk, karena data yang digunakan hanya sedikit (kurang dari 50). Dari data tes normalitas maka diperoleh nilai *p value* sebesar 0,217. Kriteria normal pada uji Shapiro-Wilk adalah nilai  $p > 0,05$ . Jadi dapat disimpulkan data tersebut terdistribusi secara normal. Sehingga analisis yang digunakan adalah *Paired Samples Test*.

**Paired Samples Test**

|        |                                    | Paired Differences |                |                 |   |          | t     | df | Sig. (2-tailed) |
|--------|------------------------------------|--------------------|----------------|-----------------|---|----------|-------|----|-----------------|
|        |                                    | Mean               | Std. Deviation | Std. Error Mean | 95% Confidence Interval of the Difference |          |       |    |                 |
|        |                                    |                    |                |                 | Lower                                     | Upper    |       |    |                 |
| Pair 1 | Biaya Riil - Biaya Klaim INA-CBG's | 395755,4           | 726778,874     | 110832,7        | 172085,9                                  | 619424,9 | 3,571 | 42 | ,001            |

Dari data *Paired Samples Tests* dapat diketahui Sig. (2-tailed) adalah 0,001 atau nilai  $p < 0,05$ . Sehingga dapat disimpulkan bahwa hasil analisis perbedaan biaya riil pada pasien JKN kelas perawatan 1 dengan kode O-6-10-I dengan biaya klaim INA-CBG's adalah berbeda secara bermakna.

**Lampiran 26.** Analisis Statistik Perbedaan Biaya Riil Pasien JKN dengan Klaim INACBG's pada Kelas Perawatan 1 dengan kode O-6-10-II

|            | Interquartile Range              |             | 603047           |            |
|            | Skewness                         |             | 1,665            | ,464       |
|            | Kurtosis                         |             | 2,279            | ,902       |

Sebelum analisis biaya dilakukan, terlebih dahulu dilakukan tes normalitas terhadap biaya riil yang kemudian diperoleh data seperti di bawah ini :

**Tests of Normality**

|            | Kolmogorov-Smirnov(a) |    |      | Shapiro-Wilk |    |      |
|------------|-----------------------|----|------|--------------|----|------|
|            | Statistic             | df | Sig. | Statistic    | df | Sig. |
| Biaya Riil | ,239                  | 25 | ,001 | ,799         | 25 | ,000 |

a. Lilliefors Significance Correction

Uji yang digunakan untuk mengetahui normalitas dari persebaran data adalah uji Shapiro-Wilk, yang dimana diperoleh nilai *p value* sebesar 0,000. Jadi dapat disimpulkan data tersebut tidak terdistribusi secara normal. Sehingga analisis yang digunakan adalah *Wilcoxon Signed Ranks Test*.

**Test Statistics(b)**

|                        | Biaya Klaim<br>INA-CBG's -<br>Biaya Riil |
|------------------------|--|
| Z                      | -3,000(a)                                |
| Asymp. Sig. (2-tailed) | ,003                                     |

a Based on positive ranks.

b Wilcoxon Signed Ranks Test

Dari data *Wilcoxon Signed Ranks Test* dapat diketahui Asymp. Sig. (2-tailed) adalah 0,003 atau nilai  $p < 0,05$ . Sehingga dapat disimpulkan bahwa hasil analisis perbedaan biaya riil pada pasien JKN kelas perawatan 2 dengan kode O-6-10-I dengan biaya klaim INA-CBG's adalah berbeda secara bermakna.

**Lampiran 29.** Analisis Statistik Perbedaan Biaya Riil Pasien JKN dengan Klaim INACBG's pada Kelas Perawatan 2 dengan kode O-6-10-II

Berikut adalah hasil analisis deskriptif dari data biaya riil pasien JKN kelas perawatan 2 dengan kode O-6-10-II

**Descriptives**

|            |                                  |             | Statistic        | Std. Error |

|            | Interquartile Range              |             | 723620           |            |
|            | Skewness                         |             | ,550             | ,616       |
|            | Kurtosis                         |             | -,498            | 1,191      |

Sebelum analisis biaya dilakukan, terlebih dahulu dilakukan tes normalitas terhadap biaya riil yang kemudian diperoleh data seperti di bawah ini :

**Tests of Normality**

|            | Kolmogorov-Smirnov(a) |    |      | Shapiro-Wilk |    |      |
|------------|-----------------------|----|------|--------------|----|------|
|            | Statistic             | df | Sig. | Statistic    | df | Sig. |
| Biaya Riil | ,202                  | 13 | ,151 | ,937         | 13 | ,418 |

a. Lilliefors Significance Correction

Uji yang digunakan untuk mengetahui normalitas dari persebaran data adalah uji Shapiro-Wilk, yang dimana diperoleh nilai *p value* sebesar 0,418. Jadi dapat disimpulkan data tersebut terdistribusi secara normal. Sehingga analisis yang digunakan adalah *Paired Samples Test*.

**Paired Samples Test**

|        |                                    | Paired Differences |                |                 |   |          | t     | df | Sig. (2-tailed) |
|--------|------------------------------------|--------------------|----------------|-----------------|---|----------|-------|----|-----------------|
|        |                                    | Mean               | Std. Deviation | Std. Error Mean | 95% Confidence Interval of the Difference |          |       |    |                 |
|        |                                    |                    |                |                 | Lower                                     | Upper    |       |    |                 |
| Pair 1 | Biaya Riil - Biaya Klaim INA-CBG's | 307296,2           | 441481,236     | 122444,9        | 40511,713                                 | 574080,6 | 2,510 | 12 | ,027            |

Dari data *Paired Samples Test* dapat diketahui Asymp. Sig. (2-tailed) adalah 0,027 atau nilai  $p < 0,05$ . Sehingga dapat disimpulkan bahwa hasil analisis perbedaan biaya riil pada pasien JKN kelas perawatan 3 dengan kode O-6-10-II dengan biaya klaim INA-CBG's adalah berbeda secara bermakna.

**Lampiran 33.** Analisis Statistik Perbedaan Biaya Riil Pasien JKN dengan Klaim INACBG's pada Kelas Perawatan 3 dengan kode O-6-10-III

Berikut adalah hasil analisis deskriptif dari data biaya riil pasien JKN kelas perawatan 3 dengan kode O-6-10-III

Sebelum analisis biaya dilakukan, terlebih dahulu dilakukan tes normalitas terhadap biaya riil yang kemudian diperoleh data seperti di bawah ini :

#### Tests of Normality

|            | Kolmogorov-Smirnov(a) |    |         | Shapiro-Wilk |    |      |
|------------|-----------------------|----|---------|--------------|----|------|
|            | Statistic             | df | Sig.    | Statistic    | df | Sig. |
| Biaya Riil | ,091                  | 72 | ,200(*) | ,958         | 72 | ,018 |

\* This is a lower bound of the true significance.

a Lilliefors Significance Correction

Uji yang digunakan untuk mengetahui normalitas dari persebaran data adalah uji Kolmogorov-Smirnov, karena data yang digunakan lebih dari 50. Dari data tes normalitas maka diperoleh nilai *p value* sebesar 0,200. Kriteria normal pada uji Kolmogorov-Smirnov adalah nilai  $p > 0,05$ . Jadi dapat disimpulkan data tersebut terdistribusi secara normal. Sehingga analisis yang digunakan adalah *Independent Sample T-Test*.

#### Independent Samples Test

|            |                             | Levene's Test for Equality of Variances |      | t-test for Equality of Means |        |                 |                 |                       |   |          |
|------------|-----------------------------|---|------|------------------------------|--------|-----------------|-----------------|-----------------------|---|----------|

|            |                             |   |      |                              |        |                 |                 |                       | Lower                                     | Upper    |
| Biaya Riil | Equal variances assumed     | 1,776                                   | ,187 | -2,002                       | 70     | ,049            | -640030,8       | 319700,21             | -1277653                                  | -2408,82 |
|            | Equal variances not assumed |   |      | -2,336                       | 31,568 | ,026            | -640030,8       | 274033,94             | -1198519                                  | -81542,1 |

Dari data *Independent Sample T-Test* dapat diketahui nilai *p* adalah 0,187 atau nilai  $p > 0,05$ . Sehingga dapat disimpulkan bahwa hasil analisis perbedaan biaya riil pasien JKN dengan pasien non-JKN pada kelas perawatan 1 adalah tidak berbeda secara bermakna.

**Lampiran 35.** Analisis Statistik Perbedaan Biaya Riil Pasien JKN dengan Biaya Riil Pasien Non-JKN pada Kelas Perawatan 2

Berikut adalah hasil analisis deskriptif dari data biaya riil pasien JKN dan biaya riil pasien non-jkn pada kelas perawatan 2.

**Descriptives**

| Jenis Biaya         |             |                                  |             | Statistic                        | Std. Error  |         |          |

Sebelum analisis biaya dilakukan, terlebih dahulu dilakukan tes normalitas terhadap biaya riil yang kemudian diperoleh data seperti di bawah ini :

#### Tests of Normality

|            | Kolmogorov-Smirnov(a) |    |         | Shapiro-Wilk |    |      |
|------------|-----------------------|----|---------|--------------|----|------|
|            | Statistic             | df | Sig.    | Statistic    | df | Sig. |
| Biaya Riil | ,080                  | 52 | ,200(*) | ,957         | 52 | ,057 |

\* This is a lower bound of the true significance.

a Lilliefors Significance Correction

Uji yang digunakan untuk mengetahui normalitas dari persebaran data adalah uji Kolmogorov-Smirnov, yang dimana diperoleh nilai p sebesar 0,200. Jadi dapat disimpulkan data tersebut terdistribusi secara normal. Sehingga analisis yang digunakan adalah *Independent Sample T-Test*.

#### Independent Samples Test

|            |                             | Levene's Test for Equality of Variances |      | t-test for Equality of Means |        |                 |                 |                       |   |          |
|------------|-----------------------------|---|------|------------------------------|--------|-----------------|-----------------|-----------------------|---|----------|
|            |                             | F                                       | Sig. | t                            | df     | Sig. (2-tailed) | Mean Difference | Std. Error Difference | 95% Confidence Interval of the Difference |          |
|            |                             |   |      |                              |        |                 |                 |                       | Lower                                     | Upper    |
| Biaya Riil | Equal variances assumed     | ,989                                    | ,325 | -,257                        | 50     | ,798            | -60713,97       | 235979,09             | -534692                                   | 413264,0 |
|            | Equal variances not assumed |   |      | -,235                        | 17,964 | ,817            | -60713,97       | 258106,72             | -603054                                   | 481626,0 |

Dari data *Independent Sample T-Test* dapat diketahui nilai p adalah 0,325 atau nilai  $p > 0,05$ . Sehingga dapat disimpulkan bahwa hasil analisis perbedaan biaya riil pasien JKN dengan pasien non-JKN pada kelas perawatan 2 adalah tidak berbeda secara bermakna.

**Lampiran 36.** Analisis Statistik Perbedaan Biaya Riil Pasien JKN dengan Biaya Riil Pasien Non-JKN pada Kelas Perawatan 3

Berikut adalah hasil analisis deskriptif dari data biaya riil pasien JKN dan biaya riil pasien non-jkn pada kelas perawatan 3.

**Descriptives**

| Std. Deviation                   | 466713,9  |                                  |           |            |
| Minimum                          | 3747900   |                                  |           |            |
| Maximum                          | 5266860   |                                  |           |            |
| Range                            | 1518960   |                                  |           |            |
| Interquartile Range              | 689055,00 |                                  |           |            |
| Skewness                         | ,249      |                                  |           | ,524       |
| Kurtosis                         | -,775     |                                  |           | 1,014      |

Sebelum analisis biaya dilakukan, terlebih dahulu dilakukan tes normalitas terhadap biaya riil yang kemudian diperoleh data seperti di bawah ini :

#### Tests of Normality

|            | Kolmogorov-Smirnov(a) |    |      | Shapiro-Wilk |    |      |
|------------|-----------------------|----|------|--------------|----|------|
|            | Statistic             | df | Sig. | Statistic    | df | Sig. |
| Biaya Riil | ,193                  | 73 | ,000 | ,584         | 73 | ,000 |

a. Lilliefors Significance Correction

Uji yang digunakan untuk mengetahui normalitas dari persebaran data adalah uji Kolmogorov-Smirnov, yang dimana diperoleh nilai p sebesar 0,000. Jadi dapat disimpulkan data tersebut terdistribusi secara normal. Sehingga analisis yang digunakan adalah *Mann-Whitney Test*.

#### Ranks

|            | Jenis Biaya | N  | Mean Rank | Sum of Ranks |
|------------|-------------|----|-----------|--------------|
| Biaya Riil | JKN         | 54 | 36,17     | 1953,00      |
|            | Non-JKN     | 19 | 39,37     | 748,00       |
|            | Total       | 73 |           |              |

#### Test Statistics(a)

|                        | Biaya Riil |
|------------------------|------------|
| Mann-Whitney U         | 468,000    |
| Wilcoxon W             | 1953,000   |
| Z                      | -,566      |
| Asymp. Sig. (2-tailed) | ,572       |

a. Grouping Variable: Jenis Biaya

Dari data *Mann-Whitney Test* dapat diketahui nilai p adalah 0,572 atau nilai  $p > 0,05$ . Sehingga dapat disimpulkan bahwa hasil analisis perbedaan biaya riil pasien JKN dengan pasien non-JKN pada kelas perawatan 3 adalah tidak berbeda secara bermakna.
