

CHAPTER V

CONCLUSION AND RECOMMENDATIONS

A. Conclusion

The existence of noken vote model has been recognized by the Constitutional Court of Republic of Indonesia. The Constitutional Court has considered noken vote model as a part of the local wisdom of papua. However, the Noken vote model has created a problem in Indonesian democratic system. There is a mistake in the consideration of Constitutional Court on the local wisdom of Papuan. In fact, Noken vote model is not a part of culture of Papuan. It is a product of New Older policy. The practice of noken vote model in fact destroy the value of local wisdom of papua.

Noken vote model is actually in contrary to the principles of Election. The existence of noken vote model is an evidence of the problem of Indonesian democratic system. The Papuans cannot use their right to choose in accordance with the principles of the election that are direct, general, free, secret, honest, and fair. The Election is the moment to express the power of the community or the holders of sovereignty in election to choose their leader. In fact, what happened in the mountain of papua, the noken vote model has become the practice of intimidation, terror and even murder.

B. Recommendations

Based on the problems as discussed in the previous chapter, it can propose some recommendations as follow:

1. The government should settle the problem of the citizen administration better in Papua because it is a vital element in process of election. The E-ID card is determine the permanent of list voter (DPT) in election. To realize the better process of noken vote model, there is a need of E-ID card should be a priority.
2. The Government and the DPR should make a more comprehensive regulation which give a guidance to the practice of noken vote model. The reconstruction of noken vote model could be regulated through revision of Election Law which determine the better concept of noken vote model.
