

## TABLE OF CONTENTS

1. Effect of Sabo Facilities after Gigantic Collapse in Mt. Bawakaraeng  
*Isprasetya Basuki, Haeruddin C. Maddi, S. Matsunaga, N. Mizuno*
2. The Occurrence of Landslides by The Earthquake Off The Coast of Padang  
*Toshiyashu Ueno, Shusaku Shiiba*
3. Application of Probabilistic Analysis for Prediction for Initiation of Landslide  
*A.S. Muntohar*
4. Flow Characteristics of Sesayap River, East Kalimantan Province, Indonesia  
*P. Harsanto, M. Fujita, H. Takebayashi, D. Legono, T.F. Fathani*
5. Time Variation of Sediment Runoff from Collapsed Mass Caused by Large-scale Landslide at Mt. Bawakaraeng, South Sulawesi, Indonesia  
*Katsuo Sasahara, Y. Shimizu, N. Osanai, T. Yamakoshi, K. Tamura, S. Doshida, K. Tsutui*
6. An Investigation into Multi-phase Slope Failure by Experimental and Modeling Approach  
*D. Tsutsumi, M. Fujita, S. Oshio*
7. Study on Sediment Management in Volcanic Area by Considering Disasters Mitigation and Resources Management  
*J. Ikhsan, M. Fujita, H. Takebayashi*
8. Numerical Analysis of Bank Erosion Process Along Banks Composed of Both Cohesive and Non-Cohesive Layers  
*Hiroshi Takebayashi, Masaharu Fujita, Puji Harsanto*
9. Impacts of Sediment Management on Socio-economic and Environment in Mt. Merapi Area  
*M. Fujita, J. Ikhsan, H. Takebayashi*
10. Lessons Learned from South-East Asian Floods  
*Rabindra Osti, Kuniaki Miyamoto*
11. The Development of Disaster Education Material for Kindergarten Schools to Support the Mt. Merapi Disaster Mitigation Program  
*S.P. Saraswati, , D. Legono, Prasetya D. A.*
12. A Self-Evacuation Drills Development Program for Community Resilience against Mt. Merapi Disaster  
*T.F. Fathani, D. Legono*
13. The Community Institution Establishment and Its Role in Sustainable Environmental Management at Mt. Merapi Area  
*B. Kamulyan, Darmanto, D. Legono, B. Zurkurniyanti*
14. A Review of Tsunami Disaster Mitigation in Parangtritis Beach Indonesia  
*R. Triatmadja, A. Nurhasanah, C. Paotonan*
15. Socio-cultural Perspective on the Effect of Soil Erosion from an Upland Cultivation Fields (A Case Study: Mrica Watershed, Central Java, Indonesia)  
*N. Suwartha, T. Marhendi, D. Legono, T. Yamada*
16. The Effort in Reducing Flooding by Polder System, The Case of East Sunter Area, Jakarta  
*A.P. Rahardjo, D. Legono, P. Harsanto*
17. Fingerprinting The Sediment Sources of Fine Sediment to Bili Bili Reservoir Using Fallout Radionuclides  
*Y. Onda, F. Wakiyama, T. Furukawa, S. Matsunaga, T. Watanabe*
18. Studies on Development and Application of General-purpose Debris Flow Simulation System Equipped with GUI  
*K. Nakatani, T. Wada, Y. Satofuka, T. Mizuyama*

19. Flow Fields and Local Scour Around Single and Two Abutments  
*Bambang Yulistyanto*
20. Study on Suspended Sediment Sampling Location Intransversal Direction of Uniform Open Channel Flow  
*Bambang Agus Kironoto, Bambang Yulistyanto*
21. Monitoring of Large Earthquake Induced Landslide Dam and Subsequent Discharge from Small Mountainous Watersheds, A Case Study of The 2004 Mid Niigata Prefecture Earthquake, Japan  
*A. Matsuoka, T. Yamakoshi, K. Tamura, Y. Nagai, S. Yamamoto, J. Maruyama, T. Kotake*
22. Numerical Simulation on Sediment Runoff Process with Sediment Dredging in the Gendol River Basin, Indonesia  
*Yoshifumi Satofuka, Miho Tanaka, Mayumi Shiraki*
23. Analysis of Satellite Images for Land Cover and the Changing at South Area of Mt. Merapi  
*H. Matsuyoshi, K. Miyamoto*
24. Public Awareness in Disaster Management through Participatory Rural Appraisal  
*Joko Sujono, D. Legono*
25. A Framework for Renovation Strategy of Sediment-related Disasters  
*Chjeng-Lun Shieh, Wen-Chi Lai, Chun-Ming Wang, Chia-Hsing Lin, Chih-Wei Huang, Min-Lang Huang*
