

ABSTRACT

The research aims to know the influence of Locally Generated Revenue, Population Number and Gross Regional Domestic Product towards the Capital Expenditure in West Nusa Tenggara. This research used Panel Data which is a combination of 10 Regencies and Cities in the period of 2010 – 2015, with the variables are Locally Generated Revenue (PAD), Population Number (JP), Gross Regional Domestic Product (PDRB), and Capital Expenditure (BM) in West Nusa Tenggara. The method used is panel regression which processed random effect model.

The result of the research showed that the Locally Generated Revenue (PAD), Population Number (JP), Gross Regional Domestic Product (PDRB) have positive and significant influence towards the capital expenditure.

Keywords: Locally Generated Revenue, Population Number, Gross Regional Domestic Product, and Capital Expenditure.
