

CHAPTER III

RESEARCH METHODS

A. Type of Research

This is normative legal research. Normative legal research is research based on the library research, focusing on reading and analysis of the primary and secondary materials.¹ It is a process for finding truth coherence, namely discovering whether existing law is in conformity with the rule of law, whether the norms in the form of a command or prohibition is in line with the principles of law and whether one's actions are in accordance with the norms of law or legal principles.²

The researcher collected the data from library in order to find regulations and theories related to the object of research.

B. Type of Data

Data used in this research is secondary data which consist of primary legal material, secondary legal material and tertiary legal material. This legal material consists of:³

- a. Primary legal materials consists of;
 - 1) Legislation
 - 2) Jurisprudence
 - 3) Treaties, ratified convention
 - 4) Agreement/Contract

¹ Johnny Ibrahim, 2006, *Teori dan Metodologi Penelitian Hukum Normatif*, Second Edition, Malang, Bayu Media, p.46.

³ Bahder Johan Nasution, 2008, *Metode Penelitian Ilmu Hukum*, ISBN 979-583-35-3, Bandung, CV Mandar Maju, p.86.

b. Secondary legal materials consists of;

- 1) Book
- 2) Journal
- 3) Research report
- 4) Scientific article
- 5) Material of seminar conference

c. Tertiary legal materials consist of several documents as follows;

Dictionary and Encyclopedia

C. Data Collection

The data were collected from library studies which aim at finding primary legal materials, secondary legal materials, and tertiary legal materials.

D. Data Analysis

The data were analyzed through descriptive qualitative. It means that researcher analyzed the data by describing all collected data and related data to the related legislation.

The data were also analyzed through reduction techniques. It means the researcher classified, directed, disposed unnecessary data and organized them, so that the final conclusion can be drawn.
