

LAMPIRAN

Lampiran 1

Rangkaian Keseluruhan Pada Modul Pengirim

Rangkaian Keseluruhan Pada Blok Penerima

Lampiran 2

Standart Operasional Prosedur:

1. Jalankan Software Monitoring Suhu Tubuh Manusia pada Personal Computer (PC).
2. Isi Form sesuai ketentuan, kemudian setting Interval Plotting dan Mode.
3. Koneksikan modul receiver ke PC, kemudian setting PORT yang sesuai modul receiver.
4. Tekan tombol “Mulai Baca Data”.
5. Tekan tombol “Mulai” untuk memulai monitoring data.
6. Pasang sensor suhu 1 dan sensor suhu 2 di modul transmitter.
7. Nyalakan modul transmitter dengan memindah posisi saklar dari posisi OFF ke posisi ON, kemudian tekan tombol “ON”.
8. Pasang sensor suhu ke tubuh (bagian aksila/ketiak) orang yang ingin dimonitor suhu tubuhnya.
9. Pilih mode manual/otomatis.
10. Jika menggunakan mode manual, maka tekan tombol “kirim” untuk mengirimkan data.
11. Data berhasil dikirim jika status kirim menunjukkan status “OK”, dan “NO” jika data gagal dikirim.
12. Pindah posisi saklar dari posisi “ON” ke posisi “OFF” untuk mematikan modul transmitter.
13. Tekan tombol  Software Monitoring Suhu Tubuh Manusia jika ingin menutupnya.
14. Charger baterai dengan adaptor 5 volt dan micro USB jika voltase baterai kurang dari atau sama dengan 3.2 Volt.
