

CHAPTER FIVE

CONCLUSION AND RECOMMENDATION

A. Conclusion

The implementation of the Local Regulation No. 2 of 2010 does not work effectively as it is, starting in the form of planning. In carrying out the Spatial Plans Regulation, there is still miss communication whether it is about the different substance of the Local Regulation or it is a miss communication among the officers.

Furthermore, the regulations which made for the implementation of this Local Regulation were not effective because the legislative and executive as the lawmaker also the executor of the law/regulation. The implementation will not work if Local Regulation was not made properly for all related parties who implement it.

Secondly, there was lack of law enforcement given by Local Government and the officer who directly face the real situation. The third one is lack of cooperation and communication between the Local Governments and the city population.

B. Recommendation

1. Recommendation for Local Government

The Mayor of Yogyakarta as Regional Head must be consistent, have a commitment to implement the Local Regulation on Spatial Plans, and increase the law enforcement against violation. The Mayor also must understand the Local Regulation that signed by him has

already suitable and can be used by the related Government Structure Organization/OPD as one as a proper and synchronize guidelines.

The DPRD as the supervisor of the implementation of the local Regulation and also part of the legislative organ must check more on the substance of the regulation whether it is suitable or contradict to the upper Law.

The Official and related OPD should do more socialization on the Local Regulation on spatial plans and its implementation. The coordination and communication between the stakeholders and the local government need to have more monitoring and assessment.

2. Recommendation for Society

The city population must be aware of the implementation of the Local Regulation on spatial plans in their own region, by involving in the controlling of utilization of the spatial plan. The spatial plans will not work well without the participation of society.
