**Latar belakang :** Asuhan Keperawatan Spiritual merupakan salah satu kompetensi yang harus dikuasai perawat. Terpenuhinya kebutuhan spiritual pasien dapat mengurangi penderitaan dan memberikan bantuan penyembuhan. Perlu adanya upaya untuk meningkatkan sikap perawat tentang asuhan keperawatan spiritual agar tindakan asuhan keperawatan spiritual bisa dilakukan dengan maksimal. Tujuan penelitian ini untuk menganalisis pengaruh penerapan Modul *Spiritual Care* terhadap sikap dan tindakan perawat dalam melakukan asuhan keperawatan spiritual di Rumah Sakit Islam Jombang.

**Metode :** Penelitian ini merupakan penelitian kuantitatif dengan desain quasi eksperimen dengan *pre-test* dan *post-test with control group*. Populasi penelitian adalah perawat di ruang rawat inap Rumah Sakit Islam Jombang. Sampel penelitian diambil dengan *simple random sampling* dengan jumlah 36 responden yang dibagi menjadi kelompok kontrol dan intervensi dengan jumlah masing-masing kelompok 18 responden.

**Hasil :** Berdasarkan hasil uji *Independent T-test* di peroleh nilai *p-value* sikap perawat *p-value* = 0,003 dan tindakan perawat *p value* = 0,040, di mana nilai *p-value* <0,05. Hal ini menunjukkan bahwa ada perbedaan signifikan sikap dan tindakan perawat pada kelompok intervensi dan kontrol di Rumah Sakit Islam Jombang.

**Kesimpulan :** Ada pengaruh penerapan Modul *Spiritual care* terhadap sikap dan tindakan perawat dalam melakukan asuhan keperawatan spiritual di Rumah sakit Islam Jombang. Hal ini bisa sebagai rekomendasi pentingnya di lakukan kegiatan edukasi, pelatihan dan *training* asuhan keperawatan spiritual kepada perawat untuk meningkatkan sikap dan *skill* perawat.

**Kata Kunci :** *Spiritual Care*, Sikap Perawat, Tindakan Perawat

## ABSTRACT

### **THE EFFECT OF IMPLEMENTATION OF SPIRITUAL CARE MODULE ON NURSE'S ATTITUDE AND NURSE'S ACTION DOING OF SPIRITUAL NURSING IN JOMBANG ISLAMIC HOSPITAL**

**Background:** *Spiritual care is one of the competencies that must be mastered by nurses. Meeting the spiritual needs of patients can reduce suffering and provide healing assistance. There are needs to be an efforts to to improve nurses' attitudes about nursing care so that spiritual nursing care can be carried out optimally. The purpose of this study was to analyze the effect of applying Spiritual Care Module on nurses' attitudes and actions in carrying out spiritual nursing care at Jombang Islamic Hospital.*

**Method:** *This research was a quantitative study with a quasi-experimental design with pre-test and post-test with control group. The study population was nurses in the inpatient room of Jombang Islamic Hospital. The research sample was taken by simple random sampling with the number of 36 respondents divided into the control group and intervention with the number of each group of 18 respondents.*

**Results:** *Based on the results of the Independent test the T-test obtained the p-value of nurses 'attitudes p value = 0.003 and nurses' actions p value = 0.040, where the p-value <0.05. This shows that there are significant differences in attitudes and actions of nurses in the intervention and control*

**Conclusion:** *There is the influence of the application of Spiritual Care Module on nurses' attitudes and actions in carrying out spiritual nursing care at Islam Hospital in Jombang. This can be as an important recommendation to do educational activities, training and spiritual nursing care training to nurses to improve the attitudes and skills of nurses*
