CURAHAN WAKTU KERJA BURUH PETIK TEH DI PT. RUMPUN SARI KEMUNING I NGARGOYOSO, KABUPATEN KARANGANYAR. 2019. RETNO PUTRI UTAMI. (Skripsi dibimbing oleh MUHAMMAD FAUZAN & FRANCY RISVANSUNA F). Rumah tangga buruh petik teh umumnya terlibat dalam berbagai kegiatan, baik kegiatan ekonomi maupun kegiatan non ekonomi. Hal ini berpengaruh terhadap curahan waktu kerja buruh petik teh yang ada di PT. Rumpun Sari Kemuning I. Penelitian ini bertujuan untuk mengetahui curahan waktu kerja buruh petik teh, pengaruh umur, upah, jumlah tanggungan keluarga, pendidikan, pengalaman bekerja, lokasi kebun terhadap curahan waktu kerja buruh petik teh, dan kontribusi pendapatan buruh petik teh terhadap pendapatan rumah tangga. Penelitian ini menggunakan data primer hasil survei dari 77 buruh petik teh menggunakan metode *proportional random sampling* dan kuisioner yang telah dirancang sesuai dengan tujuan penelitian. Data dianalisis menggunakan analisis linier berganda. Hasil penelitian menunjukkan bahwa curahan waktu kerja buruh petik teh di PT. Rumpun Sari Kemuning I sebesar 29,14 jam/minggu, sedangkan curahan waktu kerja buruh petik teh pada kegiatan ekonomi sebesar 38,90 jam/minggu dan pada kegiatan non ekonomi sebesar 129,10 jam/minggu. Faktor-faktor yang mempengaruhi curahan waktu kerja buruh petik teh secara nyata atau signifikan yaitu umur, pendidikan, dan pengalaman kerja. Kontribusi pendapatan buruh petik teh terhadap total pendapatan rumah tangga sebesar 47,65 % dan kontribusinya termasuk dalam kategori sedang.

Kata kunci : buruh petik teh, curahan waktu kerja, pendapatan rumah tangga.

ABSTRACT

WORK TIME'S OUTFLOW OF TEA PICKERS AT PT. RUMPUN SARI KEMUNING I NGARGOYOSO, KARANGANYAR DISTRICT. 2019. RETNO PUTRI UTAMI. (Supervised by MUHAMMAD FAUZAN & FRANCY RISVANSUNA F). Tea picking households are generally involved in various activities, both economic activities and non-economic activities. This has an effect on the outpouring of working time for tea pickers at PT. Rumpun Sari Kemuning I. This study aims to determine the outpouring of working time for tea pickers, the effect of age, wages, number of family dependents, education, work experience, and location of the field on the outpouring of working time for tea workers and the income contribution of tea pickers to household total income. This study uses primary data from the survey of 77 tea pickers chosen by using the proportional random sampling method and questionnaires that have been designed according to the research's objectives. Datas were analyzed using multiple linear regression analysis. The results showed that the working time of tea pickers was 29,14 hours / week, while the working time of tea pickers in economic activities was 38,90 hours / month and non economic activities was 129,10 hours/week. Significant factors that influence the outflow of working time of tea pickers in real or significant ways are age, education, and work experience. The income contribution of tea pickers to household total income is 47,65% and its contribution is included in the medium category.

Keywords: tea pickers, tea pickers, household total income.
