

MEASURING INTERGENERATIONAL INCOME MOBILITY:  
A CASE STUDY OF INDONESIA

MENGUKUR MOBILITAS PENDAPATAN ANTARGENERASI:  
STUDI KASUS INDONESIA

**FACULTY OF ECONOMICS AND BUSINESS**  
**UNIVERSITAS MUHAMMADIYAH YOGYAKARTA**

**2019**

## DECLARATION

Name : Adinda Ayu Rosyadha  
Student ID Number : 20150430216

I declared that this undergraduate thesis entitled "MEASURING INTERGENERATIONAL INCOME MOBILITY: A CASE STUDY OF INDONESIA" does not consist of any content that ever being proposed for any degree in other university, ideas of any research and publication of others, in exception all quotes and ideas which are purposely taken are considered as the research references and listed in the reference list. Therefore, if any violation of intellectual right is found in this study, I agree to accept any relevant academic consequences.

## MOTTO

*Everything comes on time... and for **a reason**. Because,*

*Allah loves his servants. He never leaves them.*

*... Never.*

## ACKNOWLEDGEMENT

*Bismillahirrahmanirrahim*

In the name of Allah, the most Merciful, the most Gracious.

All the praises and thanks be to Allah ﷻ, the only one who has brought me to life, who also will bring me to death, returning back to Him. Peace and salutation also always be to the Prophet Muhammad ﷺ. The gratitude of me will never be enough to reflect how thankful actually I am for the permission given by Allah hence this undergraduate thesis can be completed.

All students understand that this thesis is a form of an undergraduate final project. However, for me, this is more than that. This thesis is a result of the learning process, a summary of the journey, which will later be accounted for. Then, during my journey, there are human beings who have become intermediaries in delivering His amenities, who make it is inappropriate if this thesis is only recognized as personal hard work. Because, this happens with the unlimited support of various parties, including:

1. Mama. You are my biggest motivation, Ma! I always want you to be happy, not only in this *dunya* but also in the Akhirah.
2. Papa. Pa, I am sorry for all the mistakes I did. I am so sorry I have not been able to be a daughter who you can proud of. I am so sorry I still cannot well-assist you in escorting all my little siblings. So sorry sometimes I do not understand your temper when actually you are perhaps tired of taking care of

everything. I am really sorry. I hope all the things are always better time by time.

3. Dek Hana, Dek Apta, Dek Faiq, Dek Gyasi. I thank you for always trust me that I am the best sister of yours. I thank you for every support you give. Please... please be much better than me, because I know you all are more than able to do that. Please help me to make our family gather again in Allah's Jannah. I love you to the moon and back!
4. Yangkung (Alm.) & Yangti. I dreamed to have a very beautiful graduation picture all together with Yangkung and Yangti. After that, I can work, earn much money, then going to Mecca together with Yangkung and Yangti. However, Allah loves Yangkung more than me. Yangkung passed away before I can reach that dream. However, I still love you, Yangkung. I will always love you. I wish I still have time to pursue that dream for Yangti. See you again in Jannah, Yangkung.
5. Muli, Firda, Mauli, Mbak Fanny, Adra. Thank you for staying through thick and thin as well as be patient of me anytime. I know, do know, that I have many mistakes to you guys. Until this UG thesis has been done written, the worry is still within me. I worry that there is slip on my tongue leaving hurt so I have not been forgiven. I worry I am so sorry. Wishing to see you all again at the top of our own success.
6. Mbak Luluk, Mbak Mul, Mas Kukuh, Mas Han, Evy, Mas Furqon, Mbak Diena, Mas Bani. Unconditional gratitude from me for your existence, for our encounter. Thank you for always being there every time I need you, for being

that patient in dealing with my childish outburst, for all the lessons and inspiration you all give. I cannot describe how lucky I am to know you all. I believe you guys never realise that you all mean so much to me. Can't wait to meet you guys again. See you!

7. Pak Asdi. I am very grateful to have a very supportive supervisor. Several lectures could not understand me—my topic proposed. But he gives support, eases me. Thank you, Pak! You are the best! Good luck for Barcelona...
8. IPIEF 2015: Cica, Mira; for always asking where I was every time my face did not appear in classes. Winny, Hikma; for always throwing kind words and so sorry for the Solo “tragedy”. Anggun; for your guidance and patience in answering all chats I sent regarding this thesis. Rifka; for trusting me to help you regressing your data, because of that I can finish my EDP remedial smoothly. Also the others. It was awesome to be with you all for almost four years! Thank you very much for the togetherness we have been through. As the saying goes, “*Kita emang ga kompak. Tapi saling sayang!*”. XOXO.
9. IPIEF lecturers and staffs. Thank you very much for the uncountable knowledge given.
10. All people who cannot be mentioned here but surely you all are precious to me!
