

INTISARI

Penelitian dilakukan di Kabupaten Cilacap, Jawa Tengah bertujuan untuk mengetahui laju konversi lahan pertanian di Kabupaten Cilacap menggunakan data satelit berupa citra tahun 2008-2018. Penelitian dilakukan dari bulan Januari 2019 hingga maret 2019. Penelitian dilakukan menggunakan metode Klasifikasi Terbimbing atau (*Supervised Classification*) untuk mendapatkan peta laju konversi lahan pertanian.

Laju konversi lahan Kabupaten Cilacap dari tahun 2008-2018 mengalami fluktuasi. Persentase hutan lahan basah mengalami penurunan mencapai 73,61%, hutan lahan kering mengalami penurunan mencapai 77,8 %, lahan sawah irigasi mengalami penurunan mencapai 26,22 % dan lahan non-pertanian mengalami kenaikan mencapai 153,00 %. Naiknya lahan non pertanian akan mengakibatkan terancamnya ketersediaan lahan sawah dapat mempengaruhi ketersediaan pangan.
