

## **INTISARI**

Toko Home Furniture merupakan salah satu toko furniture yang keberadaannya belum begitu lama di Yogyakarta dan baru berdiri sekitar 5 tahun. Toko home furniture ini menyediakan berbagai furniture berdasarkan kebutuhan masyarakat mulai dari bahan kayu dengan tingkat kualitas bahan terendah hingga terbaik, serta model yang berbeda-beda.

Namun, di era teknologi seperti saat ini Toko Home Furniture belum menggunakan teknologi sebagai sistem informasi penjualan dan masih menggunakan sistem penjualan manual. Oleh karena itu, penulis ingin memberikan solusi dari permasalahan yang di hadapi dengan membuat penelitian langsung melalui studi kasus oleh Toko Home Furniture dan agar dapat meningkatkan kinerja dalam hal bisnis, penulis berinisiatif untuk membuat penjualan furniture berbasis web sebagai media promosi dan dapat memudahkan transaksi jual beli.

Berdasarkan masalah yang dihadapi penelitian dilakukan untuk merancang suatu sistem informasi penjualan Furniture menggunakan framework codeigniter yang dapat memudahkan owner dalam melakukan transaksi penjualan secara online.

## **ABSTRACT**

Home Furniture Store is one of the furniture stores whose existence has not been long in Yogyakarta and has only been around for 5 years. This home furniture store provides a variety of furniture based on community needs ranging from wood materials with the lowest to the best material quality levels, as well as different models.

However, in the era of technology like now Home Furniture Stores have not used technology as a sales information system and still use manual sales systems. Therefore, the author wants to provide a solution to the problems faced by making direct research through case studies by Home Furniture Stores and in order to improve performance in business matters, the author took the initiative to make web-based furniture sales as a promotional medium and can facilitate buying and selling transactions.

Based on the problems faced by the research carried out to design a Furniture sales information system using framework codeigniter which can facilitate the owner in making sales transactions online.
