PREFACE

The basis of this research is originally aimed at evaluating the programs of Bekasi Environmental Agency in managing the water pollution of Bekasi River. As the water become our essence of life, it is important to always pay more attention and preserve the natural resources as much as we possibly can. It is in my power as a human to save and also protect the essence of our life and preserve it for our future generations. Why do we spend trillions of dollars in search for our new home, when you can save our home instead?

In truth, I could not have achieved my current level of success without a strong support group. But first of all, I would like to thank Allah SWT with His gracious and His blessing, I can finally finished this undergraduate thesis. Second of all, I would like to send my gratitude to my parents who supported me with love, understanding and a huge heart. Thank you for being such angels. Second of all, I would like to thank all of my friends that have been stand beside me through ups and downs. Thank you for all your unless supports.
