Acknowledgement

Alhamdulillahirobilalamin!

First of all, thanks to Allah SWT who gave strength to me until finished this undergraduate thesis for my bachelor degree. I dedicate my undergraduate thesis to my beloved parents, Ayah Giyanto and Mama Musripah, also my brother Adi Putra Maulana for always supporting me through du'a, finance, mentally and anything thank you very much. They mean a lot to me and I love you to the moon and back fams.

Special thanks to my beautiful greatest supervisor, Mrs. Jackie (Sri Rejeki Murtiningsih, Ph.D.) that had guided and helped me until I finished my skripsi. Thank you so much for your patience and suggestion during I wrote this skripsi. Also thanks to Mr. Puthut Ardianto S.Pd., M.Pd. as my first examiner for the feedback to improve my research also Mr. Andi Wirantaka M.Hum for the feedback to improve my skripsi thank you so much sir.

Other thanks to my friends Khintan, Queen, Atta, Pita, Fera, Lia, Iza for supporting me until I finished my undergraduate research. Thanks to Renjani as my quantitative research friend for guiding me hehe. Then thanks to my Superior D'15 classmates Saadah, Nilam, Nurgro, Iqbal and other for the greatest journey that I ever

had and my KKN friends' thanks for always supporting me. However, there are lots of people that help me and I can't mention one by one but thank you so much fellas.

Last but not least, thanks to myself now I can say "You did it Indah". Also thanks to exo and day6 for fulfill and entertain me when I was bored with this. Hey SH I have done with this babe let us meet as soon as possible. Then everyone, I know this is classic but "Lets meet on TOP!"

See you when I see you all 😊

Abstract

Anxiety is one of a serious problem in the learning process for students'. Besides, anxiety also happens in students who learn speaking in English language education based on the informal conversation with English student major. Anxiety can obstruct students' improvement in learning process and could affect students' achievement in speaking class. The aims of this research was to examine students' anxiety in speaking class, students' achievement in speaking class, and the correlation between students' anxiety and students' achievement in speaking class. This research used quantitative research approach. The students of English Language Education Department batch 2018 became the participants of this research. The instrument of this research was questionnaire and document score. The mean score of students' anxiety in speaking class was 78.62; it was categorized low. Meanwhile, the mean score of students' achievement in speaking class was 50.09; it was categorized high. The data were analyzed by statistical application. The result showed that the significance value was 0.022 which is lower than sig value of 0.05 and the correlation (r value) by Pearson product moment was -0.171. It means the correlation both of variables is negative correlation. The meaning of negative correlation is when the student reduces their anxiety, so their achievement is improved. Therefore H1 hypothesis is accepted, so there were correlation between students' anxiety and students' achievement in speaking class.

Keywords: anxiety in speaking, achievement, correlation.
