

## LAMPIRAN

### 1. RANGKAIAN KESELURUHAN

### 2. RUMUS DAN PERHITUNGAN

#### a. Rumus Kecepatan

$$\{\text{Jumlah Langkah} \times \text{Panjang Langkah User (meter)}\} \div 60 \text{ detik}$$

#### b. Penentuan Nilai MET

- 53,5 meter / menit = MET 2,5
- 67 meter / menit = MET 3
- 80,3 meter / menit = MET 3,5
- 93,8 meter / menit = MET 4
- 120,6 meter / menit = MET 4,5
- 134 meter / menit = MET 8
- 139,3 meter / menit = MET 9

- 160,8 meter / menit = MET 10
- 179,6 meter / menit = MET 11
- 187,6 meter / menit = MET 11,5
- 201,16 meter / menit = MET 12,5
- 214,5 meter / menit = MET 13,5
- 230,66 meter / menit = MET 14
- 241,33 meter / menit = MET 15
- 268,16 meter / menit = MET 16
- 292,33 meter / menit = MET 18

c. Rumus Nilai Kalori

$$\text{Kalori} = \{ \text{MET} \times 0,0175 \times \text{BB}(\text{kg}) \} \times \text{waktu tempuh}$$

### 3. TAMPILAN APLIKASI
