

INTISARI

Penelitian ini bertujuan untuk menganalisis pengaruh mekanisme *corporate governance*, cakupan operasional perusahaan, dan kinerja lingkungan terhadap *environmental disclosure* pada perusahaan pertambangan yang terdaftar di Bursa Efek Indonesia periode 2015-2017. Mekanisme *corporate governance* diproksikan dengan kepemilikan asing, kepemilikan publik, direksi wanita, komisaris wanita, dan proporsi komisaris independen. Variabel lain yaitu cakupan operasional perusahaan dan kinerja lingkungan. Metode sampling yang digunakan dalam penelitian ini menggunakan metode *purposive sampling*. Diperoleh jumlah sebanyak 118 sampel. Pengujian ini menggunakan analisis regresi berganda. Data analisis menunjukkan bahwa kepemilikan asing, kepemilikan publik, direksi wanita, komisaris wanita, dan proporsi komisaris independen tidak berpengaruh terhadap *environmental disclosure*. Variabel cakupan operasional perusahaan dan kinerja lingkungan berpengaruh terhadap *environmental disclosure*.

Kata kunci: Kepemilikan Asing, Kepemilikan Publik, Direksi Wanita, Komisaris Wanita, Proporsi Komisaris Independen, Cakupan Operasional Perusahaan, Kinerja Lingkungan, *Environmental Disclosure*.

ABSTRACT

The research aimed at examining the influence of mechanisms corporate governance, operational scope of the company, and environmental performance on environmental disclosure in mining companies listed in Indonesia Stock Exchange periode 2015-2017. Mechanisms corporate governance measured by 5 proxy they are foreign ownership, public ownership, propotion of female directors, proportion of female commissioners, and proportion of the board of commissioners. This study also includes operational scope of the company and environmental performance. The sampling method used in this study is purposive sampling. The final amounts of the sample are 118 samples. This study uses multiple regression analysis. The data analysis showed that foreign ownership, public ownership, propotion of female directors, proportion of female commissioners, and proportion of the board of commissioners has no significant effect on environmental disclosure. While operational scope of the company, and environmental performance has positif significant effect on environmental disclosure.

Keywords: *Foreign Ownership, Public Ownership, Propotion Of Female Directors, Proportion Of Female Commissioners, Proportion Of The Board Of Commissioners, Listing Status, Environmental Performance, Environmental Disclosure.*
