

BAB V

KESIMPULAN DAN SARAN

A. Kesimpulan

Dari penelitian korelasi gejala rinitis alergi dengan kadar serum IL4 pada penderita rinitis alergi dapat disimpulkan bahwa tidak terdapat korelasi positif antara manifestasi klinis dan kadar serum interleukin 4 pada penderita rinitis alergi di Fakultas Kedokteran dan Ilmu Kesehatan UMY.

B. Saran

Pada penelitian ini, masih terdapat kekurangan yang harus diperbaiki untuk penelitian yang selanjutnya, antara lain:

1. Perlunya dilakukan penelitian dengan penambahan tempat pengambilan sampel.
2. Perlu dilakukan penelitian dengan sampel yang lebih banyak.
